

Employers should have already made the necessary updates to their chemical safety procedures and Hazard Communication programs. Our online safety library has the tools that you will need to train for and implement this update if you have not already done so.

The loss control consultants here at AlaCOMP can also provide you with assistance and guidance to insure that your HAZCOM program is up to date and you have met the compliance requirements. If you have questions regarding the GHS or would like more information on accessing our online safety library please contact Scott Hunter at scott@alacompins.com or Jim Hallford at jim@alacompins.com or 888-661-7119.

AlaCOMP's Safety Library has become the primary source of safety information and training material for many of our members. If you have not yet visited the library, please click on the link below to log in
